

A Triumph Joy

Busan, Korea on 12nd, July.

Damper replacement work for YORK air-condition system.

Satisfying client's various requirements and providing standards products, punctual delivery and integrated service is a creed that we always keep in mind.

One day, our manager Mr. Eric Song received an urgent inquiry from US to ask for damper of YORK marine air

conditioning system. We realized that this have to be perfectly matched in this system but original factory products were discontinued. More importantly, the ship is under repair work and will depart from shipyard in 2 weeks. Time flies, we immediately collected information and search standards to present our design and shipment proposal to the chief engineer according to client's actual demand. Client finally decided to our design as damper replacement. "It is a hard work to do customized production for such a unique product in this very short time" said Mr Eric Song. The same material, same dimensions to installation but does not affect the performance of the original product performance that we will fabricate. To ensure high product quality, Mr. Eric Song supervised the production in workshop and check every details personally. Finally, when damper arrived the destination on time, all installation work went well and our client said "the damper works great, thank you!".

[Zhiyou Marine](#) has been doing customized job for many reputable companies for many years. And we are happy to share all our experience and joy to you.
